Computer Engineering student at Fenerbahçe University, focusing on applied AI and backend development. In 2026 I completed FlyRank AI's Backend AI Engineering internship and the Microsoft AI Innovators Program.

Skilled in Python, TypeScript, FastAPI, Next.js and PostgreSQL, with hands-on work on LLMs, RAG and AI agents.

EDUCATION

Fenerbahçe University, İstanbul

BSc, Computer Engineering, Expected May 2027

EXPERIENCE

Software Developer Intern, ITserv Technology, İstanbul

Aug 2026 - Oct 2026

- Developed TypeScript features for a project management platform built with Next.js, React and Supabase.

Backend AI Engineering Intern, FlyRank AI, Remote

Jul 2026 - Sep 2026

- Completed the Backend AI Engineering and AI Fluency tracks through weekly reviewed projects.
- Capstone: a usage metering and billing system in Python that stays correct under duplicate requests.

AI Innovators Program Participant, Microsoft, Remote

Jul 2026 - Aug 2026

- Built TabForge, a local RAG agent that answers from two browser tabs (Python, FastAPI, LangChain, Foundry Local).

Software Developer Intern, ZENO Bilişim ve Danışmanlık, İstanbul

Jun 2026 - Present (continuing as a part-time volunteer)

- Worked on CRM projects with Microsoft Dynamics: setup, integrations and reporting.
- Built a local AI meeting-notes assistant and an IoT sensor prototype for a remote site (ESP32, LoRa).

Mobile App Developer, DenizBank, İstanbul

Jul 2025 (seasonal programme)

- Built an AI-integrated smartwatch finance app prototype with quick expense logging and budget alerts.

PROJECTS

LLM Commit Triage - AI Classification API

Python, FastAPI, Pydantic, Ollama | Repo: github.com/krcgoktug/flyrank-commit-triage

- Uses an LLM to review commit messages, with validated output, timeouts, retries and a background job queue.

Visual AI Decision Flow

Next.js, React Flow, Inngest, Ollama | Repo: github.com/krcgoktug/flyrank-decision-flow

- A flowchart where every step is a yes/no question to an AI model; unclear answers stop the run instead of guessing.

Data Mining for Cybersecurity - IDS on CIC-IDS2017

Python, scikit-learn, pandas | Repo: github.com/krcgoktug/Data-Mining-for-Cybersecurity-Project

- Random Forest intrusion detection with feature selection, about 99% accuracy on DoS and PortScan attacks.

Autonomous AI Parking - A* vs Q-Learning

Python | Repo: github.com/krcgoktug/Autonomous-AI-Parking-Simulation

- Compares A* path planning with a Q-Learning agent trained for 8,000 episodes on a 15x15 grid.

RATEFLIX - Full-Stack Movie/Series Tracker

React, Node.js/Express, PostgreSQL | Live: rateflix-lime.vercel.app

- Accounts, watchlists, ratings and comments with live movie data from the TMDB API.

LANGUAGES

Turkish (Native), English (B2)

SKILLS

- | | | | | |
|--------------------|----------------|--------------|-----------|----------------|
| • LLM Integration | • LangChain | • Python | • FastAPI | • PostgreSQL |
| • RAG | • Ollama | • TypeScript | • Node.js | • Docker |
| • AI Agents & MCP | • scikit-learn | • Java | • Next.js | • Git & GitHub |
| • Machine Learning | • pandas | • C / C++ | • React | • ESP32 & IoT |
