SKILLS

- Programming: C, C++, Java, Kotlin, Python, JavaScript, PHP, SQL, Verilog
- Web: HTML5, CSS3, REST APIs, Responsive UI
- Data & Infra: PostgreSQL, SQLite, Docker, Linux, Git/GitHub
- Core Areas: System Programming, OOP, AI Simulation, Data Mining

ACTIVITIES

- FBU IEEE Student Club - Member
- Actively participating in technical talks and peer collaboration events.

Goktug Karaca

PROJECT-DRIVEN COMPUTER ENGINEERING STUDENT

ABOUT ME

Project-driven Computer Engineering student focused on software engineering, AI, cybersecurity, and digital systems. I build end-to-end products from architecture to delivery with emphasis on reliability, clarity, and measurable outcomes.

EDUCATION

Fenerbahce University
B.Sc. in Computer Engineering (CENG), 3rd Year
September 2023 - June 2027 (Expected)

EXPERIENCE

System Programming Project Experience
Built containerized SIS architecture with C++, PostgreSQL, and practical backend design patterns.

Cybersecurity Data Mining Experience
Developed IDS-oriented workflows using CIC-IDS2017 dataset and model-level analysis.

Applied AI Simulation Experience
Implemented and compared A* and Q-Learning in dynamic parking simulation scenarios.

PROJECTS

RATEFLIX
Web-based movie and series tracking platform.
github.com/krcgoktug/RATEFLIX | rateflix-lime.vercel.app/login

LuminaLib
Advanced Java OOP library system with role hierarchy and thread-safe catalog design.
github.com/krcgoktug/luminalib

Digital System Design CPU Chip
Course-level CPU chip architecture with ALU, control unit, and register file modules.
github.com/krcgoktug/digital-system-design-cpu-chip

Budgee
Personal finance tracking direction focused on clear UX and practical spending insights.
github.com/krcgoktug/budgee-1

NexGen ERP
Modular ERP/CRM concept with relational integrity and SQL optimization focus.
Course project concept
